**TITLE:**

**“Ten Count Exercise”**

Submitted by: Ed McDonough | Posted on: [www.SchoolTube.com](http://www.SchoolTube.com)

## Ten Count Exercise

See examples posted on SchoolTube.com In search box on upper right type "Canton".

### **Description:**

A brief hands on instructional experience that packs in allot of basic concepts.

Finished projects can be used throughout the year as leads to projects. ie. Final Cut Pro with let you use it when printing to tape by selecting file and the storage location utilized.

### **Goals:**

- Teach capturing and editing of both Sounds and Images in a 10 second long project.
- Creative Problem Solving
- Proper Logging Technique
- Insertion of slug
- Precise Timing Skills
- Using backgrounds and viewable space effectively.

### **Process:**

1. Students videotape (or use digital stills) of the numbers 2 to 10. The twist is they can not use actual numbers. The number 10 for example could be a pencil for the number 1 and coffee cup bird's eye view for the 0.
2. Student capture audio & video separately and place it in appropriate audio or video bin.
3. Edited the images have three timing elements. Exactly 1 second for numbers 3-10, 1/29 of a second for the number 2, and 01:29 seconds and frames of slug.
4. Sound need to be edited to match the appropriate number. An audio beep signals the 1/29 the image of number two.

### **Evaluation:**

Should be distributed and reviewed before start of project.

1. Background enhances rather than detracts from image.  
10pts.
2. Placement – ie. balanced (symmetrical or asymmetrical) and within viewable space.

10pts.

3. Effectiveness of ALL number compositions. ie. 3 looks like a Three

10pts = perfect 5 pts = some design flaws 0 pts. = difficulty to determining number

**Audio:**

4. Audio leveled to -12 db 10pts.

5. Audio is clearly understood 10pts.

6. No distracting background noises 10 pts.

**Editing Technique:**

7. Numbers 10 to 3 are exactly 1 second long 10 pts.

8. Number 2 exactly 1/30 of a second or one frame and has sound beep. 10 pts.

9. Remaining 00:00:01.29 is slug. If freeze frames are used they need to be de-interlaced and flicker filtered.  
10 pts.

10. Clips are properly logged. Capture Titles and inside Image and Audio Bins.  
10 pts.
